

Advanced Materials for Non-Stick Applications

spotLESS Materials is an advanced materials coatings company delivering the best-performing environmentally sustainable non-stick coatings to the market. Led by a team of world-renowned mechanical and materials engineering experts, spotLESS Materials provides anti-fouling coating solutions to industrial partners and offers a range of consumer products.

Our patented and patent pending non-stick coating technologies have demonstrated best-in-class liquid and solid repellent performance compared to other industry-leading coating products. At industrial scale, we provide advanced coating solutions to our partners to create valued-enhancing products across a variety of industries.

Sanitation

Contamination from liquid and solid waste leads to bacteria fouling and foul odors, adding cleaning and maintenance costs

Automotive

Automotive sensor blindness can be hazardous; it also is a roadblock in the development of autonomous vehicles

Medical

Fouling across medical applications can increase cleaning times or result in life-threatening infections

While each industry has its own specific sticky problems, industries share a common pain: surface contamination compromises the reliability of their end product. Relevant surfaces need to be regularly cleaned, repaired, or replaced, which is time consuming and expensive.

This is where spotLESS Materials comes in.

Marine

Barnacle and algae fouling leads to an increase in fuel consumption, equipment downtime, and cleaning costs for underwater devices

Exteriors

With an easy coating process, spotLESS coatings turn any glass into easy-clean, hydrophobic glass

Energy

Ice and dust can significantly reduce efficiency of energy production systems

The spotLESS Difference

Applies in minutes

Reduces use of aggressive cleaning chemicals

Prevents ice accumulation

Repels sticky solids and liquid

Prevents mineral buildup

Fully optically transparent

spotLESS coatings are compatible with a broad spectrum of glass, ceramic, metals, and plastics

Partner with spotLESS

spotLESS Materials partners with global businesses seeking a range of anti-fouling solutions for their end products or internal processes.

If we already have a solution that meets your needs, we can arrange pilot and bulk product sales.

Many clients come to us with their most challenging surface contamination problems; for clients like these, we offer lab-scale, product integration, and at-scale evaluation services prior to bulk sales discussions.

Consumer Products/Bulk Sales

R&D/Proof-of-Concept Testing

Full-Scale Integration
